

May 12, 2006 – Maxion Team Selected for Award

A joint Phase II STTR proposal submitted to the Missile Defense Agency by Maxion and a research team at the State University of New York at Stony Brook has been selected for award. The Phase II project, entitled: "Interband Cascade Infrared Light Emitting Diodes for IR Scene Simulation" will build upon work accomplished during the Phase I effort. Arrays of efficient LEDs will be developed during this Phase II effort to support MDA's requirements for efficient IR scene simulators.
